

HR Analytics Dashboard Report

Project Overview

This Power BI project analyzes employee attrition patterns, workforce demographics, salary distribution, and job-role trends to identify factors affecting employee turnover.

Dataset Summary

Rows: 1480 employees | Columns: 38 attributes

Key KPIs

Total Employees: 1480
Attrition: 238
Attrition Rate: 16.1%
Average Age: 37
Average Salary: 6.5K
Average Years at Company: 7.0

Dashboard Preview

Insights

- Highest attrition is in Laboratory Technician and Sales Executive roles.
- Employees aged 26–35 contribute the highest attrition.
- Life Sciences and Medical education backgrounds show the largest employee exits.
- Most attrition occurs in salary slab up to 5K, suggesting lower compensation correlation.
- Male attrition is higher than female attrition.

Conclusion

The dashboard provides a clear HR overview and helps identify workforce retention issues. Organizations can use these insights to improve employee satisfaction, salary strategies, and retention planning.
